### THE MANUFACTURING METHOD OF RECYCLING CHIP USING A WASTE PLASTIC COMPOSITE SHEET

KR101276323	<b>País:</b> Corea	<b>Solicitante:</b> Hanyang Advenced Materials Co. ltd.	<b>Fecha:</b> 2013 / 06 / 18
-------------	--------------------	---	------------------------------

**Inventores:** Jeon Jin Man .  
Joo Deuk Ki.  
Gu In Seon.

---

**Resumen:** A method for manufacturing a recycling chip using plastic composite material waste is provided to manufacture the recycling chip with excellent physical property by dispersing in resin of a base material layer without fusing polyester fiber of the surface.

---

## RECYCLING METHOD, REGENERATED MOLDED PRODUCT, AND RECYCLING APPARATUS OF FIBER-REINFORCED PLASTIC WASTE MATERIAL

JP2013095001	<b>País:</b> Japón	<b>Solicitante:</b> Sharp KK	<b>Fecha:</b> 2013 / 05 / 20
--------------	--------------------	------------------------------	------------------------------

**Inventores:** S/N

---

**Resumen:** Recycling method of a fiber-reinforced plastic waste material for obtaining a regenerated molded product high in characteristics from the fiber-reinforced plastic waste material.

---

## MACHINE WITH ARTIFICIAL SIGHT FOR AUTOMATIC SEPARATION BY COLOUR OF RECYCLABLE PLASTICS, WITH MULTISPECTRAL SIGHT

PT1967294	<b>País:</b> Portugal	<b>Solicitante:</b> Picvisa Machine Vision Systems S L	<b>Fecha:</b> 2012 / 09 / 04
-----------	-----------------------	--	------------------------------

**Inventores:** Vicente Segui Pascual.

---

**Resumen:** The machine with artificial vision for automatic separation by colour of recyclable plastic, with multispectral vision, which uses the ultraviolet, visible and infrared zones of the spectrum simultaneously, at wavelengths of less than 400nm, between 400 and 700nm, and greater than 700nm.

## METHOD FOR RECYCLING ALL WASTE PLASTICS IN PARTICULAR MIXED PLASTICS

ES2381769	<b>País:</b> España	<b>Solicitante:</b> CVP Clean Value Plastics GmbH	<b>Fecha:</b> 2012 / 05 / 31
-----------	---------------------	---	------------------------------

**Inventores:** Hofmann, Michael.  
Gercke, Alexander.

**Resumen:** The invention relates to a method for recycling all types of waste plastics, in particular mixed plastics. According to said method, a compacted mass, in particular an agglomerate of flakes or other plastic pieces is ground in at least one refiner stage in the presence of water, fine fractions are removed together with water from the ground product that exits the refiner stage, the remaining ground product is washed and/or mechanically de-watered and dried or the de-watered ground product is ground again in the presence of water in a further refiner stage and is subsequently de-watered and dried.
